MediaStorm to hit SIGGRAPH '99

SupremeGS to display BeOS 4.5 systems in convention's Startup Park

Littleton, CO, July 20, 1999 -- SupremeGS, Inc., a manufacturer of computer hardware and software, will showcase its line of MediaStorm computers at SIGGRAPH '99, scheduled to take place August 10-12 at the Los Angeles Convention Center. MediaStorm computers, systems designed for the digital media professional, come fully loaded with BeOS 4.5 -- the media-rich operating system from Be Incorporated (NASDAQ: BEOS).

The MediaStorm series of computers includes MediaStorm Lite, MediaStorm and MediaStorm Pro. The MediaStorm Lite is currently shipping, while the latter two models will begin shipping in the near future.

SupremeGS will be demonstrating the power and ease of use of all three MediaStorm computers in Booth 1955K in the Startup Park at this year's SIGGRAPH expo.

"We are very excited to be a part of SIGGRAPH '99," said SupremeGS CEO, President and Founder Jason Pester. "We are proud to utilize this forum to display the multimedia capabilities and features of our MediaStorm line of computers."

MediaStorm Lite, which is now available at the SupremeGS Online Store (www.SupremeGS.com), is priced at \$1,499 and features a 400MHz Intel Celeron processor, a 6.4GB hard drive and a 40X CD-ROM, as well as built-in support for video -- including video-in and TV tuner -- and audio. MediaStorm Lite also includes a 120MB SuperDisk, 56K modem, built-in Ethernet, a PC98 keyboard and three-button mouse. In addition, MediaStorm Lite's processor can be upgraded to a 550MHz Intel Pentium III.

MediaStorm, the mid-level system in the series, will be featured in the Be pavilion at SIGGRAPH '99. MediaStorm is powered by a 400MHz Intel Pentium II processor and features an 8.4GB hard drive, a 40X CD-ROM, 120MB SuperDisk, 56K modem, built-in Ethernet, TV tuner, PC98 keyboard and three-button mouse. MediaStorm also has enhanced video and audio support in relation to MediaStorm Lite, including a 3dfx Voodoo3 3D graphics accelerator, 16-bit, 48KHz 3D audio with hardware wavetable, 32-voice polyphony and 16 MIDI channels. MediaStorm is upgradeable to two (2) 550MHz Intel Pentium III processors for

1.1GHz performance. MediaStorm has an estimated price of \$1,899 and is expected to ship the week of July 19, 1999.

The high-end MediaStorm Pro has all the features of MediaStorm, but has enhanced memory and processor speed, as well as improved video and audio performance. MediaStorm Pro is equipped with two (2) 400MHz Intel Pentium II processors, a 13GB hard drive, 3dfx Voodoo3 3D graphics accelerator, video-out support, 32-bit, 48KHz 3D audio with hardware wavetable, 64-voice polyphony and 48 MIDI channels. MediaStorm Pro is also upgradeable to two (2) 550MHz Intel Pentium III processors for super-fast 1.1GHz performance. MediaStorm Pro is expected to ship by early August 1999 with an estimated price of \$2,499.

All MediaStorm computers are equipped with one (1) parallel, two (2) serial and two (2) PS/2 ports. MediaStorm Lite also includes one (1) USB port, while MediaStorm and MediaStorm Pro each have two (2) USB ports.

MediaStorm computers are covered by a one-year limited warranty on parts and labor.
